Figure 1

The figure consists of two subplots. The top subplot, titled 'TDMA Time Slot Structure', shows a stem plot of Slot Level (y-axis, 0 to 1) versus Time (ms) (x-axis, 0 to 5). It displays a series of vertical blue lines at regular intervals, representing the time slots. The bottom subplot, titled 'Continuous View of Slot Allocation', shows a plot of Slot Presence (y-axis, 0 to 2) versus Time (ms) (x-axis, 0 to 5). It displays a continuous blue line with open circle markers at each time slot, representing the continuous allocation of slots over time.
